* Last updated: April 2020.

* SPSS syntax for migration background variable in TOPICS-MDS baseline care receiver:.

* Country of birth care receiver (T0_ABC) / Country of birth father of care receiver (T0_ABCFATH) /
Country of birth mother of care receiver (T0_ABCMOTH).

* Definitions for migration background are based on CBS (Centraal Bureau Statistiek) definitions:.

* See (in Dutch): <https://www.cbs.nl/nl-nl/onze-diensten/methoden/begrippen?tab=h#id=herkomstgroepering>:.

** Migration background: characteristic that indicates the country a person is connected with based on their own or their parents' country of birth.

** Native Dutch: a person whose parents both are born in the Netherlands, regardless the person's country of birth.

** Migrant: a person of whom at least one parent is born abroad.

** First generation migrant: a person who is born abroad and has at least one parent who is born abroad.

** Second generation migrant: the mother's country of birth defines the migration background of a person, unless the mother is native Dutch. In that case the father's country defines the migration background.

* This syntax initially also created a variable to indicate and distinguish Western and non-Western migrants.

** Since this classification is under discussion, we decided to no longer include this variable.

* Create variable T0_MIGRAT_BACKGR: Classification migration background native Dutch and first/second generation migrant.

* Use of variables T0_ABC, T0_ABCFATH, T0_ABCMOTH.

COMPUTE TO_MIGRAT_BACKGR=9999.

EXECUTE.

FORMATS TO_MIGRAT_BACKGR (F4.0).

* Native Dutch.

IF (TO_ABCFATH=1 AND TO_ABCMOTH=1) TO_MIGRAT_BACKGR=1.

* First generation migrant.

IF (TO_ABC >= 2 AND (TO_ABCFATH>=2 OR TO_ABCMOTH>=2)) TO_MIGRAT_BACKGR=2.

* Second generation migrant, 1 parent born abroad.

IF (TO_ABC = 1 AND ((TO_ABCFATH=1 AND TO_ABCMOTH>=2) OR (TO_ABCFATH>=2 AND TO_ABCMOTH=1))) TO_MIGRAT_BACKGR=3.

* Second generation migrant, both parents born abroad.

IF (TO_ABC = 1 AND (TO_ABCFATH>=2 AND TO_ABCMOTH >= 2)) TO_MIGRAT_BACKGR=4.

EXECUTE.

VARIABLE LABELS TO_MIGRAT_BACKGR 'Classification migration background native Dutch and first/second generation migrant'.

VALUE LABELS TO_MIGRAT_BACKGR

1 'Native Dutch'

2 'First generation migrant'

3 'Second generation migrant, 1 parent born abroad'

4 'Second generation migrant, both parents born abroad'

9999 'Unknown'.
